

Manure Transfer

PRACTICE INTRODUCTION

USDA, Natural Resources Conservation Service - practice code 634

DEFINITION

Manure Transfer is a manure conveyance system using structures, conduits, or equipment.

PRACTICE INFORMATION

The purpose of the practice is to transfer animal manure, bedding material, spilled feed, process waste water, and other residues associated with animal production to a treatment facility or to agricultural land for

final utilization as a source of organic material.

This practice is only one component to a manure management system. Manure transfer may involve one to several conservation practices such as various types of structures, pipelines, pumps, and even delivery trucks.

Additional information including design criteria and specifications are in the local NRCS Field Office Technical Guide.
